Toronto | 437-223-8208 | [loicwedji@gmail.com](mailto:loicwedji@gmail.com) | [linkedin.com/in/loic-wedji](https://linkedin.com/in/loic-wedji) | [github.com/loicwedji](https://github.com/loicwedji)

## EDUCATION

### Brock University

*Honours Bachelor of Science (HBSc.), Computer Science*

Graduating October 2027

*St. Catharines, Ontario, Canada*

- Concentrations: **Artificial Intelligence** and **Software Engineering**
- Relevant Courses: Advanced Data Structures and Algorithms, Advanced Object-Oriented Programming, Database Systems, Machine Learning, Software Testing, Software Engineering.

## TECHNICAL SKILLS

**Languages & Technologies:** Java, Python, Ruby, JavaScript/TypeScript, SQL, C++, HTML/CSS

**Frameworks & Tools:** React, Next.js, PyTorch, Node.js, PostgreSQL, Git, Docker, CI/CD Pipelines, RESTful APIs

**Spoken Languages:** French (Fluent), English (Fluent), Spanish (Familiar)

## EXPERIENCE

### Quality Engineer Intern

*TD Bank*

May 2026 – Present

*Toronto, Ontario, Canada*

- Developed and maintained backend **APIs** with **Java Spring Boot**, troubleshooting and resolving failed production jobs across financial-instrument data platforms such as **TD Easy Trade**, targeting **1M+ new accounts**.
- Built **Python** and **Robot Framework** automation integrated into **CI/CD pipelines** to validate source-to-target data flows across **1,000+ ETL jobs**, covering files, APIs, and database feeds.
- Validated end-to-end **ETL pipelines** using **SQL** and defined data-quality **test plans**, ensuring accurate financial instrument data while improving automated query performance by **15%**.

### Research Assistant

*Brock University*

Sep 2025 – April 2026

*St. Catharines, Ontario, Canada*

- Built an **unsupervised bias detection framework** with **SimCLR**, **ResNet-50**, and **PyTorch Lightning**.
- Applied **spectral clustering** on k-nearest neighbor graphs to analyze **geometric bias** through cluster metrics and embedding visualizations on datasets such as **CelebA**, **FairFace** and **CheXpert**.

### Teaching Assistant

*Brock University*

Jan 2025 – April 2026

*St. Catharines, Ontario, Canada*

- Led weekly **Data Structures and Algorithms** labs for **30+ students**, helping them apply core concepts in **Java**, algorithmic problem solving, object-oriented programming, and SOLID design through hands-on exercises.
- Supported students in **Intro to Big Data** help-desk sessions by troubleshooting **Python** code, explaining data preprocessing and analysis workflows, and helping improve their understanding of practical data science tasks.

## PROJECTS

### IntegriCode – Code Comparison Website | *React, Python, Docker, Stripe, Better Auth*

- Collaborated in a 7-person team to build a full-stack academic integrity platform for comparing **Java**, **C**, and **C++** submissions, gathering requirements and defining technical specifications alongside teammates.
- Developed backend **APIs** with **Node.js**, **Express**, and **PostgreSQL**; implemented email verification with Better Auth and Stripe payments, while supporting the Python similarity pipeline and **Docker-based** development setup.

### Ecommerce Simulation Platform | *React, TypeScript, Node.js, AI Agents*

- Built an e-commerce simulation using **AI agents** to model customer browsing, scrolling, and clicking.
- Designed agent driven interaction pipelines that analyzed user behavior and iteratively improved simulated customer experience by up to **20%** per optimization cycle through automated layout recommendations.

## EXTRACURRICULAR

### Brock Computer Science Club & Hackathons

*Event Coordinator*

May 2024 – Present

*St. Catharines, Ontario, Canada*

- Led an introductory Git and GitHub workshop and organized weekly Game Nights, themed sessions, and hackathon participation, attracting **25–60+ students** per event.
